

TAKE ACTION

in Your School or Child Care Center

1 Start a conversation
Talk with your school principal, administrator or center director about your facility's environmental health, including lead and radon.

2 Check status
Find out if any testing or mitigation has already been completed.

3 Get involved
Get your school/child care center set up to do it.

4 Seek help
Apply for a mini-grant and ask us for assistance.

5 Learn more
Visit 1000hoursyear.org and download info about effects of lead and radon. To set up a training or info session for your community group or organization, email info@1000hoursyear.org.

6 Spread the word
Connect with us on social media and be a 1000hoursyear champion for your school or child care center.
